educational series

FUTURISTIC TECHNOLOGY ◦ KALEIDA HEALTH TODAY

empower yourself with **knowledge...**

The 2007 Kaleida Health Education Series,
Futuristic Technology – Kaleida Health Today,

features a stellar line-up of physicians who will empower and excite you about the world-class treatment options available right here in Western New York. Topics include the latest advances in orthopaedic and geriatric care – available in Kaleida Health hospitals – by leading experts in their fields.

Learn about you, your
treatment options and the
exciting world of today's
medical technology »»

Kaleida Health exists to advance the health of its community through education, research and exceptional care every day, and the momentum it has created toward that end will be evident in the presentations offered in this series. Join Kaleida Health President and Chief Executive Officer James R. Kaskie as he leads this informative community outreach program with a look at the healthcare industry and the impact Kaleida Health continues to make on its community.

THIS IS AN OPPORTUNITY YOU DON'T WANT TO MISS!

For more information and to register, visit us online at www.kaleidahealth.org.

“Dr. Chung’s narrative and slides were very clear and informative and easy for a non-medical person to grasp.”

– JOHN J. LENAHAN

A New Rhythm for Heart Care
Sharper, faster, more comfortable scans

Revolutionary 64 Slice-CT technology captures three-dimensional images of the heart with exceptional clarity and detail in just five seconds. Radiologist Charles Chung, M.D., presented this incredible advance in imaging technology and wowed audience members with amazing images of the human anatomy.

“Get to Gates has a whole new meaning to me.”

– JERRY MAZURKIEWICZ

Get to Gates!

The best option for stroke treatment

World-renowned neurosurgeons L. Nelson Hopkins, M.D., and Elad Levy, M.D., of the Kaleida Stroke Care Center located at Millard Fillmore Gates Circle Hospital gave a presentation on the latest advances in the treatment of stroke, many of which are only available at Kaleida Health. Audience members were inspired by stories of remarkable patient recoveries and excited to learn about the quality stroke program offered right in their own backyard.

“Dr. Hopkins and Dr. Levy armed us with the information needed to help prevent stroke and amazed us with the results of their patients following a stroke.”

– MRS. PETER B. FLICKINGER

a recap of our last seminars...

“It was a very good presentation and very easy to understand. It was informative and very interesting as to the type of care available utilizing modern technology.”

– PHILIP M. CORWIN

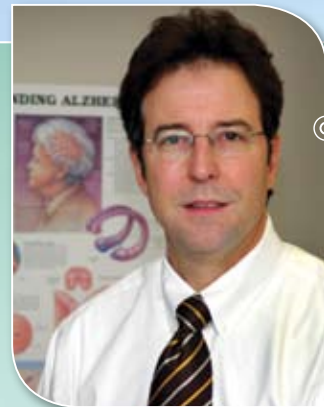

“The presentation was captivating.”

– RICHARD FRIEND

seminar 3

Thursday, March 15, 2007 • 5-7 p.m.
Millard Fillmore Gates Circle Hospital
Webster Hall, first floor

Presented by: Kenneth Garbarino, M.D.

Kenneth Garbarino, M.D.

Kaleida Health Chief of Geriatrics | Millard Fillmore Gates Circle Hospital

Dr. Garbarino graduated from State University of New York at Stony Brook and studied medicine at St. George's in Grenada and Coney Island Hospital in Brooklyn. In addition to his role at Kaleida Health, he is also a clinical associate professor of medicine in the Division of Geriatrics at the State University of New York at Buffalo.

“In the past, 80- and 90-year-olds didn’t undergo cataract surgery and were considered high-risk for hip replacements. We might not have treated urinary incontinence, and we might have ignored depression. Today healthcare professionals look at all of this differently, and the expectations of patients and their families are different, as well.”

» A New Perspective Raising expectations for health as we age

As the fastest-growing proportion of the Western New York population, new medicines and advanced technology are critical to helping mature adults live healthier, more productive and satisfying lives.

Join Kenneth Garbarino, M.D., from the Geriatric Center of Western New York and the Geriatric Ambulatory Program at Millard Fillmore Gates Circle Hospital as he discusses the escalating needs of a growing elderly population and the best ways to meet them. Dr. Garbarino specializes in the care of patients over the age of 70, particularly those dealing with complex medical issues and/or memory loss, and will offer information on the following:

- New medicines for osteoporosis
- Better drugs for dementia
- Advanced options for treating high cholesterol and diabetes
- Answering the question of surgery and the elderly patient: Is it too risky?

seminar 4

Thursday, May 10, 2007 • 5 - 7 p.m.

Buffalo General Hospital
Swift Auditorium, A-building

Presented by: Kenneth A. Krackow, M.D.

Kenneth A. Krackow, M.D.

Chief of Orthopaedics | Buffalo General Hospital

Dr. Krackow graduated from Johns Hopkins University with a bachelor's degree in mathematics and studied medicine and graduate mathematics at Duke University in Durham, North Carolina. In addition to his role at Buffalo General, he is also a professor of orthopaedic surgery at the State University of New York at Buffalo.

Through a collaborative effort between Buffalo General and UB, Dr. Krackow led the development of technology for computer-assisted total knee replacement surgery (Knee Navigation System), which was launched out of Buffalo General in 2001 and introduced to orthopaedic surgeons nationwide in 2002.

"The Knee Navigation System now enables us to see, in no uncertain terms, what the optimal approach to each person's total knee replacement is."

» Evolution and History Exploring advances in hip and knee replacement

In the United States approximately 638,000 total hip and knee replacements are performed annually, and Buffalo General Hospital is home to an expert orthopaedic team that specializes in these procedures to improve independence and change lives.

Join Kenneth A. Krackow, M.D., an internationally renowned surgeon and research pioneer in lower joint reconstruction/replacement, as he explores the history of orthopaedics at Buffalo General. Dr. Krackow will also discuss the latest exciting developments in the orthopaedic field, including:

- Computer-assisted surgery
- Improved design of knee replacements
- Robotics
